

 Aker Solutions

Location: Aberdeen International Business Park

Project Date: 2015

Desking Supplied: move! Electric Back to Back Benches

Total Supplied: 1664

Brief

Aker Solution's new 335,000 sq. ft. office was to house 2,500 staff and the requirement was to supply a large quantity of height adjustable desking. The entire project was to be completed within 10 weeks.

Solution and Outcome

We supplied back to back, sit-stand benches with electric lifting mechanisms, allowing employees to adjust the height of their desks at a touch of a button. These were tailor made with graphite frames and white, chamfered edge tops. Our move! sit-stand desks are an ever increasing choice, as they provide the user with flexibility and represent the very essence of good ergonomics.
